

In the Specification:

Please cancel the title and replace it by the following new title: - - METHODS FOR INHIBITING ANGIOGENESIS BY EphB RECEPTOR ANTAGONISTS - -

In the Claims:

1. (Currently amended) A method of inhibiting angiogenesis in a mammal comprising administering to the mammal, outside the uterus, an amount of an EphB receptor antagonist which is effective for inhibiting angiogenesis in the mammal, wherein the antagonist binds an EphB receptor.
2. (Original) The method of claim 1 wherein the mammal is a human.
4. (Original) The method of claim 1 wherein the antagonist comprises an antibody.
5. (Currently amended) The method of claim 4 wherein the antibody binds an EphB4 receptor.
6. (Original) The method of claim 1 wherein the mammal is suffering from a disease or disorder characterized by undesirable or excessive vascularization or vascular permeability.
23. (Currently amended) The method of claim 1 wherein the antagonist binds an EphB4 receptor.
